Education

The University of Texas at Austin

Bachelor of Science in Electrical and Computer Engineering

Austin, TX

Dec 2023

Experience

Professional Software Engineer

Jul 2025 – Present

Cotality (formerly CoreLogic)

Austin, TX

- Delivered an inspection reporting UI that met tight beta launch deadlines while handling deeply nested data.
- Saved business over 100 hours by migrating proven branding strategy while transitioning to a new project.
- Kept mobile, web, and API in sync by creating system using Conflict-free Replicated Data Types.
- Prevented duplicate email notifications by designing deduplication queue during CRDT push events.
- Architected automated messaging feature with user configurable delays and triggers, improving customer experience.
- Mentored intern through design, implementation, and release of the configurable automated messaging.

Technologies: Angular, NgRx, Spring Boot, Flutter, Dart, Cypress, Jest, Velocity, Mixpanel, Jenkins

Associate Professional Software Engineer

Aug 2023 – Jun 2025

Cotality (formerly CoreLogic)

Austin, TX

- Unified branding across OneHome, Matrix, and MLS Touch, impacting millions of real estate professionals.
- Implemented web assembly color extraction from branding logos with 87% of users accepted palette on first try.
- Reduced bulk branding API call times by 95% with Redis caching, cutting response time from minutes to seconds.
- Improved testability and predictability by migrating SPA state management to NgRx with Cypress integration tests.
- Created an admin web app that empowered product teams to resolve customer issues without engineering intervention.
- Kept downstream services fresh through Kafka-driven cache invalidation while reducing direct service coupling.
- Expanded market for OneHome by working cross team to ship referral links feature that enabled free trial.

Technologies: Angular, NgRx, Spring Boot, Redis, Elasticsearch, Kafka, Cypress, Datadog RUM, Mixpanel

.NET Software Engineering Intern

Jun 2023 – Aug 2023

CoreLogic

Austin, TX

- Refreshed legacy table view into an Inspection Status Notifications Web Application for user-friendly tracking.
- Automated cross system notifications via RabbitMQ and an internal SQL message on database updates.
- Managed home owner subscriber email and SMS notifications through an internal SQL letter queue.

Technologies: .NET 6, C#, Angular, EF Core, SQL, RabbitMQ

Projects

League of Legends Build Analytics

Aug 2025 – Present

Rust, Next.js (SSR), GCP

- Ingests ~100k matches per day to calculate win rates by item, lane, and champion for post-game insights.
- Provides SEO-optimized slug links that allow players to validate builds and share results across social platforms.

Core3DXL: Web based 3D Interactive Home Tours

Oct 2024

Gaussian Splatting, Angular

- Interactive 3D property walk-throughs and an embedded viewer in the OneHome website.
- Extracted crisp frames from user recorded house walkthrough to train Gaussian splats & cleaned resulting point cloud.
- Won 2024 Market Impact award at company hackathon for revenue implications of this feature.

Community Reputation & Economy Discord Bot

Sep 2024

Node.js, MongoDB, GCP

- Supported ~1k community members with daily rewards, jobs, and mini-games that increased server retention.
- Added leaderboards and P2P transfers to boost competition and user activity across 400+ active users.

Technical Skills

Languages: TypeScript, Java, C#, Go, Python, Rust, SQL, HTML, CSS

Frameworks & Libraries: Angular, NgRx, Cypress, Spring Boot, .NET 6, Node.js, Next.js

Cloud & Infra: GCP (GCE), Kafka, Redis, PostgreSQL, Jenkins, CI/CD

Analytics/Observability: Datadog RUM, Mixpanel
